Projects

URL Shortener | *Node.js, Express, MongoDB Atlas, AWS Elastic Beanstalk* — [Link](#)

- Developed a robust URL shortener application using Node.js and Express for backend functionality, and MongoDB Atlas for data management.
- Implemented dynamic base URL detection to support seamless deployment across local environments, Netlify, Heroku, Google Cloud Platform and AWS.
- Deployed the application on AWS Elastic Beanstalk, ensuring scalability and high availability.

Portfolio Website | *Figma, HTML, CSS, JavaScript, Node.js, Express, GitHub* — [Link](#)

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript for a seamless user experience.
- Designed an intuitive layout with modern UI elements to effectively showcase projects, skills, and achievements.
- Implemented a contact form with backend integration using Node.js and Express to handle form submissions and provide real-time feedback.
- Utilized GitHub for version control and collaborative development, ensuring consistent updates and tracking of project progress.

AIT Lost and Found Portal | *Figma, HTML, CSS, JavaScript, GitHub* — [Link](#)

- Designed and developed a user-friendly portal for reporting and locating lost items at AIT.
- Utilized HTML, CSS, and JavaScript to create an interactive and responsive front-end.
- Streamlined form submission and item tracking features to enhance user engagement.
- Secured 3rd place in the TechxElevate competition, sponsored by the college.

Achievements

- 3rd Place in TechxElevate sponsored competition, AIT - September 2023
- Winner of Unnati by E-Cell, AIT - May 2022
